Profile

Motivated Integrated M.Tech Software Engineering student at Vellore Institute of Technology with strong academic performance and experience building AI-driven and full-stack applications. Interested in research opportunities related to artificial intelligence, and intelligent data-driven systems.

Research Interests

- Artificial Intelligence and Machine Learning
- Data Analytics and Predictive Modeling
- Cybersecurity and Phishing Detection
- Blockchain Applications
- Intelligent Decision Support Systems

Education

Vellore Institute of Technology, Vellore

M.Tech Integrated Software Engineering — CGPA: 9.27

Aug 2023 – May 2028

Vellore, Tamil Nadu

Relevant Coursework

- Optimization Techniques
- Database Management Systems
- Operating Systems
- Computer Networks
- Data Structures and Algorithms
- Artificial Intelligence

Projects

AI-Based Dropout Prediction and Counseling System

React, Vite, Tailwind CSS, Recharts/Chart.js, Firebase, Gemini API

- AI-powered risk intervention dashboard integrating academic, financial, and behavioral data to identify at-risk students and enable early counseling strategies.

Event Reminder Web Application

Flutter, Firebase

- Developed a customizable event reminder application allowing users to schedule and manage important events.

Phishing Website Detection System

VirusTotal API, GoPhish, JS, Node.js

- Security dashboard integrating automated threat analysis and phishing simulation tools to improve cybersecurity awareness.

AI Travel Buddy – AI Travel Planner

React, Firebase, Google GenKit, Gemini, JS

- AI-powered travel assistant providing itinerary planning, conversational recommendations, budget tracking, and real-time travel insights.

BLOCK SUTRA – Blockchain Student Certificate Verification

Solidity, React, Ganache, HTML, CSS, JS, Node.js, MetaMask

- Blockchain-based certificate verification system ensuring secure and tamper-proof validation of academic credentials.
- Built a decentralized certificate verification system using Ethereum smart contracts written in Solidity to prevent academic credential forgery.
- Implemented the frontend using React and integrated MetaMask wallet authentication to enable secure certificate issuance and verification by institutions and employers.
- Used Ganache for local blockchain development and testing while connecting the backend (Node.js) to interact with smart contracts through Web3 for real-time verification.

Achievements

- **SIH 2025** – Top 100 shortlisted teams.
- **Innoventure 2025** – Runner Up in business simulation event by E-Cell.
- **Web3Verse** – 3rd Place in blockchain competition conducted by IEEE PCS.

Skills

- **Languages:** C/C++, Python, Java, SQL
- **Frameworks/Libraries:** Flutter, NumPy, Pandas, SciPy, Scikit-Learn
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase
- **Developer Tools:** VS Code, Git, Jupyter Notebook, Jira, Canva, Azure DevOps, Jenkins
- **Testing Tools:** JUnit, QTP
- **Editing Tools:** VN, Inshot, CapCut, Filmora, Clipchamp

Leadership & Extracurricular Activities

Sahiti Video Editing – Technical Member

Organizing Committee Member – Riviera and graVITas

- Press and Media, Registration and Reception, and Stalls coordination.

VIT Community Radio – RJ
